

BABII OLEKSANDR

Full-stack Web Developer

Odesa, Ukraine | github.com/Konradiuss | t.me/Alexander_Konrad | wa.me/380963443808 | regularguy835@gmail.com

SUMMARY

Full-stack web developer whose core stack is Vue, Nuxt, TypeScript, and Node.js. I design and build web applications end to end, including the interface, the server side, integrations, and deployment infrastructure.

EXPERIENCE

TsUIT / ЦУІТ

Full-stack Developer

Zaporizhzhia, Ukraine, Remote

04.2026 — Present

- Develop web services and information systems for the Zaporizhzhia Regional State Administration.
- **ZODA Memorial** — online memorial with a public catalog, search, a map, and a CMS (Nuxt, Payload CMS, PostgreSQL).
- **Air Monitor Kyiv** — localized air-threat alert system by district and community (Python, aiogram, Telethon).

BELNET

Frontend Developer

Odesa, Ukraine, Hybrid

05.2025 — 03.2026

- Built the frontend of the ISP's new modular ERP system up to alpha: architecture, shared components, state, REST and GraphQL API integration (React, Next.js, TypeScript).
- Took a Telegram Mini App for field installers from prototype to a working interface (Vue, Tailwind CSS).

OIAC / ОІАЦ

Head of Software Development (formerly Software Engineer)

Odesa, Ukraine, On-site

09.2024 — 05.2025

- Promoted to department head after six months; assigned tasks to and supervised two staff members.
- **R&D Hub Platform** — hackathon platform with an admin panel and roles (Vue 3, Express, PostgreSQL).
- **Odesa Interactive Map** — built in 4 days (Vue 3, Leaflet, Express, PostgreSQL).
- **Employee Attendance System** — Telegram bot tracking attendance and statuses (Python, aiogram, PostgreSQL).
- Maintained 40+ WordPress sites of territorial communities and regional bodies.

SUITT / ДУІТЗ

First-Category Specialist, Center for Online Learning Technologies

Odesa, Ukraine, Hybrid

09.2022 — 06.2026

- Deployed the university's Moodle platform and administered it: roles and access, updates, support for faculty and students. Part-time since 09.2024.

PET PROJECTS

Artillery Spotter Calculator | *React, JavaScript, Tailwind CSS, SVG, LocalStorage*

[GitHub](#) · [Demo](#)

A web calculator for Foxhole players that simplifies calculating distance, azimuth, and corrections for artillery fire.

DiscoCV | *Vue 3, TypeScript, Three.js, Vite, Vue Router, Vitest, Playwright*

An interactive disco-themed portfolio site that combines a resume with a full 3D scene and interactive elements.
